TO WHOM IT MAY CONCERN

AFTER was selected in 2017 through a European public tender as the sole provider of registration, accreditation and access control services for all the official events organized by Italy's latest Presidency of the G7 (from January 1 to December 31 2017).

In this capacity, AFTER seamlessly managed, in strict coordination with the Italian Government, the G7 Summit of Heads of State and Government and the G7+Outreach Countries, both held in Taormina (Sicily) on the 25-26 may, as well as 11 meetings at ministerial level and about a hundred additional events during 2017, which encompassed multiple formats and locations. In so doing, AFTER catered with impeccable professionalism and with a remarkable degree of flexibility the needs of a diverse attendance of more than 10 thousand participants, including government delegates, media representatives and law enforcement officials. During the G7 Summit, AFTER was able to respond and effectively organize in a very short time the access into the red zone of the entire population of Taormina.

AFTER showed a very deep knowledge about high-profile international events where Governments and Institutions are involved and a unique capacity in the use of the latest generation technologies available in the field. Moreover, AFTER was able to identify effective solutions to secure results in critical situations, performing at its best to providing results beyond the expected.

Its commendable work was repeatedly acknowledged by national stakeholders of the Italian Presidency and international Authorities, proving to be instrumental to the organizational success of the Italian Presidency of the G7 in 2017.

In conclusion, I wholeheartedly recommend this company to any Government or Institution as a true leader in the field of registration, accreditation and access control services.

Sincerely,

Min. Plen. Alessandro Modiano
